Age Range: 5 - 8 years

Grade Level: 2 - 3

Customer Reviews

Captain Kidd's Crew Experiments with Sinking and Floating is a fun tale of pirates and their quest for knowledge in buoyancy, density, and volume. The colorful and cute illustrations perfectly compliment the informative text and would make for a fantastic read aloud in any elementary classroom preceding a "Will it Float?" class experiment.

"Sinking and Floating" gets top marks -- our kids love to read it and we ALL learned a lot. I read recently that Mark Weakland received another award for his writing, this time from California. His writing is clever and his science lessons strong. We love this book.

I wish this book had clearer concepts. I thought it was gonna be appropriate for youngsters. .but it's a bit too advanced. The shipping and conditions book arrived are excellent though.

Great book! I love this series. My 5 year old loved it (especially since it was about pirates), and it really helped me understand density and volume better too !
