## Customer Reviews

This book starts at the beginning of the tractor era and keeps on going right to the up to date machinery and technology today. We have a three and a half year old son that new all(and I mean all) of the tractors in this book before he hit age three. We sat with him night after night and day after day with this book. He just kept wanting to know these tractors and what they were all about. We live on a farm and the cover of this book is the same tractor that his Popa drives every day. He has since destroyed the first book from so much reading, so we are ordering a new one from a book store in Rocky Mtn. House where we live. We will try to keep this one in a little better shape so that he can pass it on to his children one day. Thank you so much for making a book with so many pictures and so much information on each tractor, who knows, maybe some day he'll grow up to be a farm machinery repair man or something. Thank you again
