Grade Level: Kindergarten - 1

## **Customer Reviews**

Kids are always looking for something fun to do, so if your child likes to color, they can learn all about numbers and shapes while being artistic. Each page is well organized with colorful borders and black-and-white "coloring book type" pictures. The focus is on preparation for a more formal study of math. This is a complete home-study program to encourage children to practice the essential math skills they are learning at school. The workbooks were compiled and tested by math experts and are designed to increase your child's success at school. In the front of the book you will find a Progress Chart and a page of stars. Once your child has completed each page, you stick a star in the box that corresponds with the lesson. The workbook is designed to help your child explore the world of numbers in a fun and enjoyable way. There are connect the dots games, Can

you remember? challenges and counting games. The Content: Names of the numbers 1-10 and 11-20 Sequence, or order of the numbers. Number values. Understanding the quantity that each number represents and that, for example, 5 is always 5. It may be 5 big buses in a row or 5 small peas in a circle, but it is still 5! That when counting, the last number names the set. Many children count the quantity accurately 1, 2, 3, 4, but in response to "how many?" they often say the wrong number. How to recognize written numbers. How to write numbers. How to recognize a number when it is written in words, and how to write it. The concepts of more than and less than, initially by looking and then by counting. Adding numbers together, language involved in the addition process, symbols for addition and subtraction.
