Math > Biological Sciences > Ecology

Age Range: 8 and up

Grade Level: 3 - 7

Customer Reviews

Like all Eyewitness books, this one is full of information and great photos. We have a large collection of these books and look forward to enjoying them for years to come.

A page is cut out of the front, it is not missing any pertinent information, but it looks unattractive. The binding on the book is well on its way to disintegrating. Did not come with any supplemental materials. All it is essentially good for is to sit on a shelf in my classroom for students to reference to.

Information was good and more extensive and what was expected. Was disappointed in length of book as was expecting longer book for this age level.

Eyewitness always has great books. Solid info with good pictures and examples. I have it on display

in my classroom.
