# Polar Bears And The Arctic: A Nonfiction Companion To Magic Tree House (Magic Tree House Fact Tracker)

## Synopsis

Track the facts with Jack and Annie! When Jack and Annie got back from their adventure in *Magic Tree House #16: Polar Bears Past Bedtime*, they had lots of questions. Why is the Arctic so cold? What did the first people of the Arctic eat? How do polar bears cross thin ice? What other animals live in the Arctic? Find out the answers to these questions and more as Jack and Annie track the facts. Filled with up-to-date information, photos, illustrations, and fun tidbits from Jack and Annie, the Magic Tree House Fact Trackers are the perfect way for kids to find out more about the topics they discovered in their favorite Magic Tree House adventures. And teachers can use Fact Trackers alongside their Magic Tree House fiction companions to meet common core text pairing needs. Have more fun with Jack and Annie on the Magic Tree House website at [MagicTreeHouse.com](http://MagicTreeHouse.com)!

Age Range: 7 - 10 years

Grade Level: 2 - 5

## Customer Reviews

We love all the research guides for MTH. They are written at a higher Lexile level than the stories but it makes them fun to read together. My 6 year old doesn't have the patience to read through a research guide the entire way through on her own but together it makes for a fun project...she gets

to tell me about what happened in the story to Jack & Annie and together we learn some fun facts about whatever time/place the story was about.

This research guide was purchased for my classroom. In the first week I had it available, six students were on the waiting list to check it out. Once again Mr. and Mrs. Osborne have provided a teacher/student friendly support book for a Magic Tree House book.

On the 'Arctic Circle' map part of Russia (page 17) is mislabeled as 'Iceland'. On this map you can find Iceland on page 16, between Greenland and UK. I think that it is important for a research guide. I didn't mean to write the book review though... Great book!

Polar bears and the Arctic was a great book. I learned many interesting facts about polar bears. Polar bears live in the Arctic, near the North Pole. The Arctic is in the Arctic Circle. The Arctic Circle covers an area about as large as North America, Canada, Russia, Norway, Sweden, Finland, Iceland and almost all of Greenland are in the Arctic Circle. The planet is getting warmer because of the burning of coal and oil as fuel. We use fuel in cars, houses, and factories every day. These fuels are melting the ice in Antarctica which is making the polar bears die. The government has a list of animals that are endangered and many people have asked that polar bears be placed on the endangered species list. I would recommend this book to anyone who likes to read about polar bears. They should read this book because it has a lot of facts about polar bears. There were also pictures of polar bears. One picture is a polar bear looking at the sky. There are other pictures of polar bears eating, drinking and pictures of baby cubs. by B.H

I have a three and five year old girls and this is the best series going. It is appropriate for the Kindergardener and we have read every single book. Each book in the series is give or take 100 pages but it is a quick and easy read. In reading the books your kids not only get a great story but also pick up on a little history which can lead to some great discussions. I actually read the books with my ipad close by so I can google pictures of the things/places that Jack and Annie (the brother and sister in the books) visit or see. I would recommend these books for every parent/child. When I am done I will be donating the entire set to the local library. Regarding pricing, if your intent is to read the entire series look for don't buy the four book package or single books. There are set of 1-28 and I think there is a set that is everything published 1-48. As with most things, if you buy the whole set you save significant money!

I bought this for my daughter to read on her Kindle for iPod touch. It is uploaded in landscape. It will not turn upright to portrait such that she cannot see the words. It also made the Kindle app "freeze" in landscape. Clearly something wrong with the file.

What a delightful experience you get with the Magic Tree House Books. Go on a magic adventure with your kids and there imaginations. Hands down winning by an easy victory for our Family!!!!!!

Awesome series for my 4 1/2 year old son. We love the stories, but I especially love the research guides that go along with the stories. I love seeing my son so interested in learning!
