Life-Size Dinosaurs (Life-Size Series)

Synopsis

Gargantuan creatures deserve a truly mammoth book. With amazingly huge, life-size pictures, plus 7 gigantic gatefolds, this spectacular guide will practically transport readers back to the time of the dinosaurs. It's astounding: for the first time, pictures convey the actual, awesome bulk and bigness of the large dinosaurs and present intricately detailed views of the smaller species, too. Just open up the three 8-page-long gatefolds and the four 6-page ones to see what these vanished creatures looked like close-up. Life-size illustrations virtually take you into the Tyrannosaurus Rex's drooling mouth, with its sharp teeth ready to rip up prey. Kids will love looking at the immense and thick skull of the bone-headed Pachycephalosaurus, with its bumps, ridges, and horns. The knife-like claws of the Therizinosaurus are so realistic you just might step back in fear. In addition to the breathtaking illustrations, there's plenty of fascinating background about the different dinosaur types, their shared world, their way of chatting and battling, and their fight for survival. And as an extra treat: take off the jacket, flip it over, and there's a big poster of a giant dinosaur on the reverse side.

Book Information

Age Range: 7 - 12 years

Series: Life-Size Series

Hardcover: 28 pages

Publisher: Sterling (September 1, 2004)

Language: English

ISBN-10: 140271775X

Customer Reviews

Luckily for dinosaur fans, there are new dinosaur books coming out all the time. Just when you think you have seen all that a picture book can be, along comes one like "Life-Size Dinosaurs." It's title

and concept is straight forward: Stuff each large format page with actual-sized artwork of different Dinosaurs. Many of the illustrations completely fill 4-panel fold out spreads from corner to corner. With an assortment of all sizes, there are dinosaurs small enough to be shown in entirety while others that can only be shown as close-up pieces such as the crest of a hadrosaur or the toothy mouth of a Tyrannosaurus. It doesn't matter that 90% of the critter can't even fit on the page because no book has ever brought us in so close like this before. The effect is a sense of real encounter with dinosaurs. As a bonus, the T-Rex mouth is also printed on the inside of the book jacket with the option of unfolding and hanging it up as a poster. All in all this book is a good example of how kids books are just better than grown-up books!

I agree wholeheartedly with the other 5-star review posted already, but have to add that this book is made even better by its great price. This is a huge book, and I almost didn't bother to pick it up at the bookstore because I figured a book this big must be \$20 or more. But it is only *half* that, less than \$10, which is nearly unheard of for modern kids' picture books. Buy it because it is a fantastic book that will fascinate you and your kids alike, and appreciate that it is a steal at this price.

This book has a great amount of information. The descriptions of some of the Dinosaurs were very good, and the huge pictures gave you a feeling of wondering how awesome the mighty giants were. Delivered in GREAT speed and everything as advertised and more, it is a very good book.!!!!!!!

The previous reviews say it all. This book is so engaging that my kindergarten-age son and I both love it. The illustrations are mind-blowing, when you hold them right up to your face and see how a T-Rex could chomp off your head with just a nibble. Other books don't do justice, even when they have the drawing of a human standing next to the dinosaur. At our school's Scholastic Book Faire, we bought the Life-Size Sharks book for my son, and we bought this Life-Size Dinosaurs book as a gift for his class. When we got it home, he loved it so much that he insisted on keeping both books. Now we have to get another one, so we can make good on our gift to the class. If you have a school-age kid, save yourself some trouble and just buy two copies. The price is right.

A very good book for young children who love dinosaurs. My 3 1/2 and 1 1/2 year old grandsons love it.

Awesome Dino book for my preschool classroom! Thanks!

My preschool kids loved this book (and so did I)!

The little one loved it!
