National Geographic Kids Everything Weather: Facts, Photos, And Fun That Will Blow You Away

Synopsis

Weather can be wild, freaky, and fascinating! Powerful twisters roar through homes; earthquakes shatter whole cities; hurricanes fly through towns. How does it all happen and how do we know what we do? All you need to know about weather and all of its wildness will be found in the pages of this colorful, energetic, and accessible book. Kids will also learn about real-life encounters with wild weather from National Geographic tornado chaser, Tim Samaras, featured in "Explorer's Corners" throughout the book. Packed with fun facts and amazing photographs, this book gives kids an in-depth look at these amazing natural phenomena. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

Beautiful pictures, full color, and the information my daughter just loves! this is a great book for young readers interested in weather. our daughter has had anxiety about various types of destructive weather ever since learning about hurricane katrina, and then in her own lifetime, hurricane sandy. we thought reading about how weather works would help her get past that. she also got a telescope for christmas so this was a great compliment along with a book about space

from this same series, and another book about constellations. definitely a must have for any kid who likes science. my little girl is 1st grader but reading at about a 4th grade level. this book is good for strong readers and for adults to read to their children because the graphics are so vivid and well laid out on the pages. it has a good balance of words and pictures and is well-written. national geographic never disappoints me.

I think this book explains in very simple terms how weather evolves. I got this book for my 3rd grader and he whizzed right through the entire book in a day and half. He was intrigued by the engaging pictures as well. One thing I would like for National Geographic to do is expanded on some of the topics more so that a child could use it as a reference for a science report. National Geographic is a well-known name and their books are quality products.

This was purchased for my 12 year old son. He loves reading the stories, looking at the colorful pictures which he feels that is exciting and cool.

Bought this for my grandson to better understand weather....wonder for 7 yr old. Very easy to read and understand....perfect gift.

I am a weather nut and I purchased this for my daughter. She is facinated with storms and there is lots of pictures and information for her. I enjoy reading this with her.

My Grand Dugther has found this to be a great help with her school projects and studies, as has two other grand children. All have found it interesting and a great read.

Learning proper terminology about weather for and with my grandson was my goal in purchasing this book. I was not disappointed!

I don't think you can go wrong with anything from National Geographic. There is always so much to learn about.
